

ABOUT OSBORNE ASSOCIATION

For 90 years, Osborne Association has served individuals, families and communities that have been adversely affected by the criminal justice system. Today, we operate more than 25 programs, reaching over 10,000 people in a typical year. These programs offer vital opportunities for transformation, reconciliation, and healing that are necessary for a more safe and just future. Alongside the services we provide, our advocacy team works to ensure that our laws and policies further the success of the people we serve.

Osborne's greatest strength is its passionate and expert staff, many of whom bring decades of experience as service providers, or as individuals who have been directly affected by incarceration. As a result, we develop uniquely human, holistic, and data-driven solutions that provide individuals with the tools to rebuild, including employment and training, health care, healthy relationships, and a home.

We are tremendously grateful to our supporters, like you, for joining us in honoring every person's capacity to change — and every family's capacity to heal.
